## SUMMARY

Software Engineer with 6+ years of experience building scalable backend services and SaaS applications in agile environments. Passionate about leveraging cutting-edge tech in distributed systems and AI to build fast and resilient solutions.

## SKILLS

**Programming Languages & Tools:** Python, JavaScript, Node.js, React, PHP, Bash, MySQL, LangChain, SQL, NoSQL, PostgreSQL
**AI/ML:** PyTorch, Scikit-learn, LangChain, RAG, LLMs, AI Agents, Prompt Engineering, Cursor, Claude Code, Ollama
**DevOps & Infrastructure:** AWS, Docker, Kubernetes, Jenkins, Linux, Git/GitHub, Grafana, JIRA

## EXPERIENCE

**Software Developer | Washington State Department of Licensing** **Jun 2025 - Sep 2025**

- Built RAG-based document classification system with LangChain, processing 15K+ daily scans and cutting review time 30%.
- Built conversational SPA interface with responsive React frontend, deferring LLM initialization to cut page load times by 45% and boost user engagement.
- Architected serverless deployments on AWS ECS Fargate, cutting cloud infrastructure costs by 30%.
- Implemented unit and integration tests using PyTest and PyMock, achieving 95% test coverage to ensure stability.

**Senior Software Engineer, Head of Client Technical Support | Intend Software** **Apr 2020 – Dec 2023**

- Built and deployed RESTful APIs for ERP SaaS microservices, serving as the communication backbone across distributed components and supporting 10K+ daily transactions.
- Built accounting integration pipeline for QuickBooks utilizing micro-batching backed by Redis, reduced API calls by 94% and sync failures by 70%.
- Developed CRM analytics dashboards using optimized SQL queries with Redis caching to serve real-time and historical data; reduced load times by 65% and eliminating manual report generation.
- Designed and developed Grafana dashboards for metrics visualization and alerting, improving ERP health visibility by 70% and enabling early detection of performance bottlenecks.
- Containerized and deployed microservices on AWS EKS using Docker, automating builds and deployments through Jenkins CI/CD pipelines, reducing deployment time by ~50%.

**Full Stack Engineer | Proshore Nepal Pvt. Ltd.** **Feb 2019 – Aug 2019**

- Developed full-stack web applications using HTML, CSS, JavaScript, Node.js, and REST APIs, leveraging MVC architecture to deliver scalable and maintainable business solutions.
- Integrated Stripe and Square by building a payment gateway abstraction layer to standardize transaction workflows and streamline multi-currency authorizations, reducing payment errors by 35%.
- Refactored relational database schema and migrated legacy datasets via optimized SQL scripts, boosting performance by 30%.

## PROJECTS

**KeelWorks Foundation - AI Learning Hub | AI Agents, React, LLM, LangChain, RAG** **Aug 2026 - Ongoing**

- Led POC for AI Learning Hub, designing a grounded LLM pipeline with mandatory source-citation constraints to evaluate and mitigate hallucinations.
- Built Human-in-the-Loop (HITL) evaluation framework, capturing reason-coded QA rejections to drive automated prompt iteration and benchmarking

**Onboarding Accelerate - Agentic AI System | Multi-agent, MCP, Context Engineering, ADK, Gemini** **Dec 2025 - Jan 2026**

- Built an agentic AI onboarding system using multi-agent orchestration and Model Context Protocol principles to integrate internal knowledge and external references, enabling stronger reasoning and role-specific Q&A.

**Drug Use Prediction Using Machine Learning | XGBoost, PyTorch, Pandas, NumPy, Scikit-Learn** **Dec 2024 - March 2025**

- Conducted XGBoost and PyTorch classification to predict behavioral traits linked to drug usage.
- Performed data wrangling, feature visualization, and hyperparameter tuning using NumPy, Pandas, and Matplotlib.
- Identified high-risk behavioral traits as ‘Openness for experience’ with ~75% prediction accuracy.

## EDUCATION

**Master’s of Science in Information Management** – University of Washington Information School **Sep 2024 - Dec 2025**
*Courseworks: Machine Learning, Artificial Intelligence, Data Science, Linux and Bash, Statistics*

**Bachelor of Information Technology** – Kantipur City College, Purbanchal University **Sep 2013 - Nov 2017**
*Courseworks: Computer Science, OOPS with C/C++, Distributed Systems, Data Structure & Algorithm, NLP*
